You can control where your comments come from from within Photoshop. You can also choose how you'd like to deal with your comments. Want to show specific comments to your client when you're ready to call it a day? Now you can. **See and respond to comments on a document.** Way back in Photoshop CS6, it was possible to add comments to an image—adding them to an element tag or the image itself—but they did not show up in the right location when you closed the document. Now you can see and respond to comments directly on the image. Modern digital cameras have evolved immensely in the last year, and the new Adobe Photoshop camera Raw plug-in updates the processing engine to reduce color noise and to clean up the image, essentially making the process of getting a good-looking image out of your camera as much more straightforward.
